

meat tying machines

T.G.M. 350 AUTOMATIC HIGH SPEED STRINGING

Meat presentation better and much quicker than done by hand. This tunnel tying machine does away with the tiresome hand binding with meat twine. Whether meat, fish or poultry, with or without filling, the T.G.M. 350 guarantees optimal binding results and an attractive appearance of your product even for irregular cuts of meat. The tunnel concept ensures a continuous flow of material even long roasts do not need to be turned round in order to bind them completely. Due to the knotting after each loop, a simple portioning of the roasts is possible without the twine fraying. The T.G.M. 350 automatic even does the job automatically

**Low maintenance simple layout of components
make maintenance easy**

24Vplc control circuit with automatic reverse cut-off

Clutch less breaking motor

**Toggle switch for single and
double binding mounted on
4 casters for mobility**

**Can be used for the widest variety
of dimension and types of meat**

Stainless steel construction

**Water proof encapsulated
electric components**

Can be used in wet areas

**Tunnel diameter:
320 x 300 mm**

**Performance (single):
Up to 60 bindings/min**

**Performance (double):
50 bindings/min**
